# RECREATIONAL FACILITIES

# SKYFOLD

Easy to use and fully automatic, Skyfold partitions offers state-of-the-art acoustics ranging from STC 48 to 60 and innovative partition panels that fold vertically in an accordion style.

Client's greatest concerns with vertically operable walls:

- User group safety and installation costs

How using Skyfold overcomes these concerns:

- Two switches (or touch screens) required on each side of the wall for operation
- Bottom obstruction safety sensor
- Electromagnetic brake rated for 200% of the motor's torque rating
- Skyfold systems require far less structural support than other products
- Modular design allows for lower installation cost

## MODERNFOLD

Satisfy a variety of needs from basic sight separation to sight and sound separation with Modernfold's line of durable, high quality space division products.

Client's greatest concerns with folding partitions in a workspace setting:

- Aesthetics

How using Modernfold overcomes these concerns:

- No vertical trim on solid opaque panels
- 51 STC glass partitions – Industry highest!
- White steel track finished to match standard T-bar systems instead of clear anodized aluminum
- Unlimited finish options from fabrics, applied vinyl, to custom millwork

## DORMA HUPPE

Easily add refinement with fully automated operable solid and glass partitions with clean lines and endless flexibility in space management.

Client's greatest concerns with automatic horizontal partitions:

- Being tied to a standard panel stacking location in the centre of the room

How DORMA Hüppe overcomes these concerns:

- Panel stacking locations not tethered to the partition run line
- Ability to store panels in a corner of a room, or another room altogether
- A proven product used at leading government projects across Canada

# SMOKEGUARD

Fire retardant curtains, sometimes referred to as fire or smoke curtains, are curtains specially designed to keep building occupants safe from both heat and smoke during a fire. While many commercial buildings already utilize fire curtains, a growing number of recreational facilities now have these curtains installed for life protection.

Client's greatest concerns with fire and smoke door products:

- Housing space & esthetics

How using Smokeguard overcomes these concerns:

- Smaller housing units, with most being between 160mm x 160mm – 225mm x 260mm
- Powder coated white ceiling covers (or select any RAL colour)
- Low profile side guide and jambs

## KALWALL

Kalwall has been the top choice for daylighting recreation facilities around the world for more than five decades. Our balanced, natural daylighting provides a glare free environment that also enhances the envelope's thermal performance and mitigates solar heat gain.

Client's greatest concerns with fenestration products:

- Cost, thermal performance, and longevity

How using Kalwall overcomes these concerns:

- Lower upfront cost than typical curtain wall systems
- Self cleaning and virtually maintenance free
- Highest insulating daylight system in North America, with up to R20 panels
- Solar heat gain coefficient values typically between 0.15-0.08
- Colour stable, south Florida tested, and designed to be a lifetime building product in Ontario
- Available high impact face sheets rated for 230 ft. lbs of impact (over 7.5X more impact resistant than tempered glass) that works great for hockey pucks, baseballs, and indoor golf.

## SOLATUBE

Solatube Daylighting Systems feature innovative optical technologies that balance light output and thermal performance, delivering optimal light levels without uncomfortable heat gain, glare or shifting patterns of light. Solatube's unique design also minimizes impact on the building envelope, allows for easy integration with electrical lighting systems and eliminates ongoing maintenance. The result is a cost-effective and energy-efficient solution that brings daylight to previously unreachable spaces—like corridors and gymnasiums.

Client's greatest concerns with top mounted daylighting products:

- Leaks and condensation, and cost

How using Solatube overcomes these concerns:

- High impact, optically advanced domes which meet DoD Antiterrorism standards and FM rated
- One piece leak-proof & insulated flashing
- FEMA Safe Room rated for Tornados and Hurricanes
- Incredibly cost effective

# STRUCTURESUNLIMITED

StructuresUnlimited has engineered, fabricated, and installed countless large span skylights and canopy designs for the recreational market for almost 50 years. A single source solution to design, engineer, fabricate, and erect cost-effective entrance canopies and large clearspan skylights using factory finished, structural aluminum systems clad with Kalwall translucent panel.

Clients greatest concerns with entrance canopies:

- Cost & schedule implications

How using StructuresUnlimited overcomes these concerns:

- Lower total cost of ownership than traditional built-up canopy systems
- Single source from start to finish (no more “finger pointing”)
- Always on-time and on-budget
- Factory finished aluminum framing
