

OPTIONS DE FINITION

OPTIONS DE FINITION

Un véritable perturbateur de l'industrie. Sur un marché où les produits sont peu performants sur le plan acoustique, où les délais de livraison sont longs et où les prix sont élevés, Line Systems a été introduit en Amérique du Nord pour tout changer. Notre objectif est d'améliorer la qualité de la production, les délais et l'esthétique sans compromettre la conception ou les caractéristiques.

Nous avons créé un solide réseau de distribution avec une installation de qualité de nos produits. Des partenariats internationaux ont été développés dans de nombreux pays à travers le monde, tandis que le siège social reste à Bruxelles.
